MANAGEMENT FOCUS

Grow demand without diluting credit quality

01

Protect quality

Protect the strong good-loan share as application volume expands.

02

Monitor mix

Monitor credit-card concentration and the 36-month term mix.

03

Flag early

Use DTI and interest-rate thresholds as early-warning indicators for charge-off risk.

04

Recover exposure

Prioritize recovery actions where funded exposure is high and received amounts lag.
